PREFACE.

THE most valuable facts contained in this volume are derived from the records preserved in the Oxford and Cambridge Colleges. There are a few farm accounts of New College, which continued the practice of agriculture on account of the corporation for about thirty-five years after the commencement of the fifteenth century; but for the most part the record is that of expenditure, not of production. The accounts, however, of the Oxford Colleges are not precise in detail. It appears that the annual roll, signed by the bursars, was merely an abstract of a more detailed account, which, having served its immediate purpose, was cast aside or destroyed. Thus the accounts of Magdalen College, Oxford, contain one year, 1 Ric. III, in which the original method of stating the balances is represented, and a large volume of rough entries from which numerous, and those very valuable, facts have been derived. But as a rule the entries are disappointing. The Oxford Colleges, which at an early date abandoned baking and brewing on their own account and dealt directly with tradesmen, seldom give quantities. They are also careless in keeping accounts, and sometimes the head of the College reproves the bursars for neglect of duty.

The following Oxford Colleges have supplied information—Merton, New, Oriel, Magdalen, Corpus. The Merton accounts have become scanty and barren; those of New College, apart from the farm records, are more copious and detailed. The Oriel records, though broken, give considerable information as to the price of wine and wax, these being purchases on behalf of S. Mary's Church, of which the Provost and Fellows of Oriel were the Rectors and impropriators. Magdalen, besides what it supplies on its own account, contains many rolls of Sir John Fastolfe's estates, part of which, not without some suspicions of sharp practice, the founder contrived to secure to his college. These records are exceedingly valuable, not only as indicating prices in Norfolk, but because they throw light on the transactions of a wealthy soldier of fortune, who had gathered opulence in the French wars, and are the accounts of a rich landowner who traded largely in agricultural produce with the Low Countries. Later on, the Corpus Christi accounts, which are unbroken from the reign of Edward VI, give a great deal of incidental information on prices.

The records of the Cambridge Colleges, especially those of King's Hall (now incorporated in Trinity) and King's College, are far more valuable. The ancient custom of buying wheat, barley or malt, and live stock was continued in these Colleges, though not quite uninterruptedly, till the latest period in which they supply information to this volume. The King's Hall accounts continue, with a few breaks, and occasionally with mutilations, through the whole of the fifteenth century, and for the first forty years of the sixteenth. Those of King's College, with similar breaks, reach from the middle of the fifteenth to

the conclusion of the period. They are all written on paper, and were collected and bound, as it appears, in the early part of the eighteenth century. Some few of the fifteenth-century accounts in the King's Hall series have been displaced. But a careful examination and an exact comparison of facts, and in a few cases, of prices, have put it into my power to determine the date of each document with precision. These two sets of accounts have enabled me to complete my register of corn prices. Without them, I could not have achieved the task which I have set before myself for the last sixteen years. I have gradually, and with infinite labour, completed that task; of bridging over the dark and difficult period of English social history which lies between the beginning of the fifteenth century and the application of Elizabeth's statute, under which wheat and malt prices have been regularly registered every six months in the archives of those corporations which have come under the statute. Any single year of the King's College accounts contains far more information than has hitherto been published on the whole one hundred and eighty-two years.

Additional facts have been gleaned from the accounts of Peterhouse, Cambridge, especially for the early period, and from Pembroke, in the same University, for the later part of the time. I had hoped to supplement these records from those of S. John's, Cambridge. But the accounts of this corporation are very inaccessible, and deplorably dirty. I obtained a casual and transient view of the collection, but had no time for the purpose of sorting and reviewing them. I may here express my thanks for the courtesy and kindness of the authorities in the four Cambridge Colleges to which I had ready

access. The extracts which I have made from the *perituraе chartae* of these ancient records have been exceedingly valuable. I wish I could have gained more.

There are a few, but these highly instructive, accounts in the British Museum and the Bodleian Library. Such are the two years of Osney Abbey, the two Writtle accounts, and the extracts from the Shrewsbury account book of the Sheffield and Rotherham mills. I have also inspected the corporation accounts of Norwich, from which several highly valuable facts have been collected, a few archives in Norwich Cathedral, and an important collection of fragments of the Canterbury accounts, put together by Mr. Shepherd of that city. I have gained some important items from the surviving relics of the accounts of Fountains Abbey, which were supplied me by the owner, the late Mr. Walbran, and from those of the corporation of Oxford.

Certain printed volumes published by the Surtees Society, the Roxburghe Club, and other similar antiquarian institutions have given me important particulars. Such are the accounts of the Finchale, Wearmouth, and Jarrow houses, the Durham house accounts, the Howard accounts, and divers valuable papers in the Archæologia, and similar collections. The last year of my enquiry is the first of the Shuttleworth (Gawthorp) account. To these should be added the fabric rolls of York Minster.

But by far the largest amount of information has been derived, as before, from the Record Office. Here the most copious are those of the abbey of Battle, especially the estates of Lullington and Apuldrum, retained in the hands of the monastery as home farms for the supply of agricultural produce, but above all the accounts of Sion

Abbey and its dependencies. Sion Abbey was founded by Henry V, being almost the only conventual establishment set up in the fifteenth century, and was richly endowed from the alien priories. Many of its estates were in Devonshire, and give important facts, frequently before the foundation of this great religious house. But the accounts of the years which survive from the once numerous records of Sion are all full and precise, each official presenting copious and exact details of his expenditure, the whole being afterwards reduced to an abstract, which is nevertheless still exactly rendered. Unfortunately only a small part of this precious collection, the most important, were it perfect, imaginable, survives. The purchases of the various officials were made in all quarters and in all markets, and the records are in the highest degree instructive. They are continued, though with great breaks, from the foundation in the middle of the fifteenth century, to the eve of the dissolution. Sion had a home farm at Isleworth, some accounts of which survive.

There is also an instructive series of accounts, preserved in the national archives, from Coleshull near the Cotswolds. Here was an extensive sheep farm, the purchases and sales on behalf of which are with few interruptions still extant. Unluckily the head shepherd is not entrusted with the sale of wool, and as a consequence, I have not procured much evidence from this series as to the price of Cotswold wool. The building accounts of Henry VIII and Elizabeth in the Bodleian Library have been another copious source of facts.

The Record Office contains numerous, but generally single, accounts of various abbeys. These have been in-

corporated into the general aggregate of facts. There are also in the same place many household and wardrobe accounts of the King's household and the minor establishments, such as, for example, in the reign of Henry VIII, of Mary and Elizabeth Tudor. Similar is the single account of Elizabeth's establishment at Hatfield during the reign of Edward. Some of these wardrobe accounts have been used, but warily and sparingly. Towards the end of the period, and after the great exaltation of prices has been, after violent efforts and a few fluctuations, settled, the wheat prices in the wardrobe accounts are wholly untrustworthy, the Crown having plainly purchased at fictitious prices. Perhaps it adopted the rule, which was practised long before the statute of Elizabeth at King's and Pembroke Colleges, of receiving part of its rents in corn payments at nominal values. It appears to have also done the same by salt. But in other matters, it buys at market rates. I see no reason to suspect the prices at which the Crown buys oats, hay, cattle, and sheep.

There remains a large and important series of documents which have been consulted in the Record Office and elsewhere. They are too numerous to be specified, though I may refer to the housebook of Hickling Priory, in the Tanner MS. (Bodley), and the accounts of Selborne Priory, Hants, in the Magdalen Tower; this Priory having been suppressed at Waynefleet's instance, and its estates transferred to the college, which that prelate was founding. Altogether I have consulted at least eighty thousand documents, some barren, but most supplying a fact which has added a link in the evidence.

The labour which supplied the material of my first two

volumes was comparatively easy. Few of the documents which I consulted failed to supply me with abundant evidence, and some were very rich. But the archives of the fifteenth and sixteenth centuries are, with rare exceptions, scantily fruitful. The labour which has resulted in the facts contained in this volume has been peculiarly wearisome, very costly, and frequently disappointing. I have spent days in gathering a very poor harvest of facts. But the aggregate is more considerable than that of the second volume, though of a somewhat different character. In certain particulars, my materials are relatively, in others comparatively defective. But all are germane to the object before me—a history of prices and of English society.

I was quite ready to anticipate that labour, such as I have bestowed on this subject, would not be attractive, and would remain unappreciated. In this country such is the fate of all original research. There are, however, few Englishmen who incur the penalty of neglect, because they have sought to enlighten their fellow-countrymen and the world on topics which are new and have their permanent place in the history of human progress. But I have the satisfaction of knowing that my work is not unappreciated abroad, especially in Germany, the *magna mater virûm.*

It is necessary that I should comment on the deficiencies in this volume of research. The record of corn prices, though it is complete as regards wheat, is slightly defective on other kinds of grain, some years being unrepresented by prices of barley, malt, and oats. But I have no doubt that the proportion which might be hypothetically supplied would be found, were entries hereafter discovered, to be even closely or exactly in accordance with the

hypothesis. For it is the nature of such averages as are derived over long periods, and from numerous entries, that the inference as to related values applies to such periods or times as are not actually represented by prices, when analogous, or it may be identical, causes are affecting similar objects. Thus, as salt was obtained by solar evaporation only, and as high prices of wheat, due to prolonged or inopportune rain-falls, are recorded, I should predict with confidence, even if no direct evidence were forthcoming, that a high price of wheat would be accompanied by a high price of salt, and *vice versa*. Analogies of a similar kind could be discovered and extended. The reader will have the opportunity of noting how I have been able to make use of them in the comments of the fourth volume.

The evidence as to the price of wheat and other kinds of grain in the first two volumes was derived from many localities, though sometimes in small quantities. In the present volume, the localities are usually few, but the entries are in general numerous, and the quantities are large. In several cases, where the quantity is large, and the entry is single or only two or three entries are made, the record is that of an average from numerous and successive purchases made over the whole year. This is the case with the Cambridge Colleges occasionally, and with Sion frequently. The significance of the entry is in such cases nearly as great as if it had been expanded into all the items of which it is composed, for it is not difficult to determine the periods of the year at which a rise or fall ordinarily occurred.

I can readily admit that had I been able to obtain evidence such as that which is found in the second

volume, I should have been far better satisfied with the results. But I do not relinquish the confidence, on the present occasion, with which I stated, when dealing with the earlier part of my enquiry, that were an equal number of facts discovered subsequently, no material modification would be made on my annual averages, and none appreciable on my decennial and general averages. For the fact is, the purchases of such consumption as is registered in these volumes were made over very wide areas, with tolerably easy and cheap communications, and with fairly accurate knowledge as to the state of supply and general demand. The Cambridge Colleges employed an active man of business, for example one of the Pastons, as their steward or manciple. They sent him in all directions and to all markets. When it was possible for a Norfolk gentleman to engage in a lucrative trade in malt and barley with the Low Countries, in spite of statutes prohibiting or checking the importation of grain, we may be sure that an opulent Cambridge College, alive to its own interests, and conscious that an economy in necessaries left a larger margin for luxuries, would search carefully for similar advantages, and be ready to get the profit of them. King's College buys produce at as great a distance as South Hants, and, as I shall show, land and water carriage was cheap.

The character of the purchases and the circumstances which accompany the transactions have also to be taken into account. The quality of the articles is the best, or the best procurable, and represents full prices in a keenly debated market. For, in these times, produce was bought for what it would fetch, and was unaffected by the profits or speculations of middle men and dealers.

The record of prices is a record of genuine market values, and is thereupon as conclusive as it is instructive.

When I turn to other kinds of farm produce, I must regret that my evidence is far less copious than before. I cannot present such tables of wool, butter, cheese, and eggs as I could in my earlier volumes: even the prices of some kinds of stock are far less numerous and regular than they were before. But, on the other hand, such evidence as I have found is equally suggestive and sometimes more significant. I lack again that full information as to articles employed in the economy of agriculture which was so abundant in my first two volumes, such as prices of tar, hurdles, and the various forms of manufactured iron which are employed by the farmer in the several parts of his industry. But these deficiencies will in several particulars be found to be compensated or supplemented. Thus the record of the price of wool is defective, but the information as to the price of cloth is far more copious than before. I can give but little information—I had but little previously—as to the price of hemp and flax. But in these volumes the reader will find copious and almost continuous values of linen and analogous textile fabrics. The price of some kinds of grain is scanty; that of hay and straw is abundant. These contrasts might be multiplied.

The information as to the price of wine and other kinds of foreign produce is large, far larger than before. The register of sundry articles is long and very varied, partly because it was not thought expedient to make separate tables of particulars which were but seldom represented, but more because so many new objects, as might indeed be expected, are enumerated. So it has

been thought expedient to give a separate table of the prices of labour in or on the royal works, with a view to contrasting the employment of labourers by the Crown with the payments made by private individuals and corporations. Most of these labour prices on royal works are taken from the accounts of Henry VIII, preserved among the Rawlinson MSS. in the Bodleian Library. The extravagance of this monarch is amazing, and fully explains the poverty and degradation to which England was reduced during and after his mischievous reign.

The length to which this volume has run, and the scanty space left me for illustrative documents, have made me chary in admitting such additions. But I have thought it expedient to illustrate my facts by a few such pieces of evidence.

The farmers' and collectors' accounts are examples of many such documents. Those of Alton Barnes, on which estate New College, the owners of the manor, relinquished cultivation on their own account in 1430, are intended to show what was a land and stock lease during the fifteenth century, and in the period which intervenes between the old method of landlord cultivation and the new occupancy, in which the landlord supplied all permanent repairs, but the tenant contributed all the capital, live and dead, necessary for adequate cultivation. Here the tenant is debited with a little over 68 quarters of grain, five horses, eleven oxen, a bull, three cows, two steers, two yearlings, 294 wethers, seven rams, 160 ewes, 120 hoggs (with a provision as to losses by disease being borne beyond a certain number by the lord), a sow, five hoggetts, five pigs, five geese, and six fowls, with divers kinds of dead stock, all to be restored at the termination of the

lease or their equivalent money values. The other accounts of the same estate show that, in some particulars at least, stock was still leased to the tenants as late as 1530, a century after the College had abandoned agriculture. The tenant in the first roll is Tutte, in the second Benger.

The Takley account is intended to illustrate another kind of tenancy, where the estate of the manor is let to several tenants, and especially to three farmers—King, Inde, and Porte. But the accounts are also intended to show how serious were the arrears of rent. Fleming, the collector, claims allowances for bad debts to the amount of £67 10*s.* 4*d.*, and gives a list of arrears, some of long standing, due from fourteen persons, and amounting in the aggregate to £213 9*s.* 0½*d.*

The Oxford rental has been chosen with a view to showing what were the landlord's liabilities for town tenements, both as to their character and extent. Here again there are, besides expenses, outgoings, and arrears, the latter looking very like bad debts, void holdings to a considerable amount, and similar losses. The rental gives a hint that New College must have had a large quantity of timber in its Oxford property, since the sum of £99 1*s.* 1*d.* is entered in the margin as the product of a sale during this year, though the amount is not reckoned in the totals.

The longest document is the account of the building of Merton bell-tower in 1448–50. This is an interesting account of all the details of expense incurred for a structure which is still standing, even though, as might be the case, a part of the nave of the church, if it were ever built, was pulled down in order to complete the

conveyance of land made by Merton College to Fox, the founder of Corpus Christi.

The indenture of apprenticeship is the earliest which I have seen. The terms are almost identical with those employed in modern times for similar deeds. The Cheltenham award is a singular illustration of the method by which tenants by copy contrived to reduce their liabilities, and throws much light on the history of those tenures. The rules of College discipline, extracted from an account-book of King's College, Cambridge, not only illustrate the character of college life in the fifteenth century, but supply the latest date as yet discovered in the reign of Edward V, June 24, 1483. Lastly, the proclamation of Elizabeth, not indeed issued, but extracted from a MS. in the great collection of Elizabeth's proclamations preserved in the Bodleian Library, is a valuable contribution to the history of the currency restoration, and sets the policy of the great Queen in a new light. That it was not issued was due to causes which can easily be surmised, but the intention is a matter of singular interest.

The indices will be found very copious, and it is to be hoped useful. A desire to shorten what might be superfluous led me to omit other places than those which supply corn prices from the first index.

The whole collection is my own work, except the papers supplied me by the late Mr. Walbran.

TABLES OF PRICES.

TABLES OF THE

PRICES OF AGRICULTURAL PRODUCE.

GRAIN.

In the following tables of the price of Grain, the evidence of each year is ranged under five heads: I. Wheat; II. Barley, Drage, Malt, and occasionally Bere; III. Oats; IV. Rye and Mixtil; V. Beans, Peas, Vetches, Pulse. Beans and Peas are occasionally sold if not sown together.

Under three of these heads, quantities to which no letter is prefixed are to be understood as Barley, Rye, and Beans respectively.

Under the second head, D. denotes Drage, M. Malt, when the grain malted is not designated, B. M. Barley Malt, D. M. Drage Malt.

Under the fourth head, M represents Mixtil.

Under the fifth, P. and V. stand for Peas and Vetches.

The year is almost invariably from Michaelmas to Michaelmas, i. e. for instance, from Sept. 29, 1401 to Sept. 29, 1402. The year therefore throughout these tables contains, as in the previous volumes, two years, of which the greater portion is chronologically in the second year. The object of such an arrangement was to represent the harvest. For the sake of uniformity the same rule is adopted in reckoning the prices of other produce, and of other values. The exceptions to this method of account and audit during the period included in these volumes are fewer than those in the previous volumes, and when the exception does occur, the date of the audit is put only slightly later. In one, a short series of accounts, that of Downham, the date is from Lady Day to Lady Day. The distribution of the items contained in this particular series has been effected relatively to the character of the produce.

The order in which the places are arranged is alphabetical. As before, an index will be given at the end of all the tables of prices, which will as far as possible denote the locality of the source from which the evidence is derived.

The quantities are generally reckoned in quarters or sums, bushels or strikes, and pecks. Sometimes the measure is called major mensura, at another minor, and the relative proportions of these quantities is given. The quarter contains eight bushels, the bushel four pecks. Late in the period, the quarter is used on one estate and on one occasion to designate another and far larger measure, and in one or two cases the sum of oats appears to contain sixteen bushels.

In the north of England, especially on the Eastern side, the chalder or chaldron or celdra is occasionally used as a measure for all kinds of grain. It appears to contain thirty-four bushels.

The accounts give prices of meal, wheat and oat. Sometimes coarse wheat meal goes by the names of pollard, chete, and grudgins.

The letters Sup. Com. represent the words *supra computum*, i. e. sales effected after the account was made up, and generally entered on the back of the Roll. They are therefore the latest prices of the year.

The record of the prices of inferior grain, called scurril or cursal corn, is generally omitted. The corn must therefore be considered to be of good quality. As before, it is not possible to adopt this rule in the case of oats.

PRICES OF STOCK.

TABLES OF THE

PRICES OF AGRICULTURAL PRODUCE.

STOCK.

The following tables contain prices of agricultural produce, under five heads; Cattle, Horses, Sheep, Pigs, Poultry.

Cattle. Entries with no letter prefixed to them are Oxen. C. stands for Cows. Other names for Cattle are Steers; Bovetti or Bovettae; Bovecti and Bovectae; Boviculi; Annales, or yearlings; Bulls; Juvenci and Juvenculae; Calves; Stirks; Stotts; animalia; twynters; bullocks; Heifers; Kyes or Kine. Sometimes Oxen are described as fat, or draught. Cows as dry or milch. Cows are sometimes sold with calves.

In the later years prices are given of Oxen by the carcase or by the stone of 14 lbs.

Horses. Comparatively few horses are purchased or sold for agricultural or industrial purposes, especially after the first fifty years of the accounts, most of the entries being those of saddle horses. There are a few Affri (A.), a term the meaning of which has been explained before, and occasionally the word stot is employed to denote a horse. The colours of the horses are given generally, and the use for which they were intended, the pace of the animal when under the saddle, &c. Sometimes the horse is bought with a name.

Sheep. Under this head are found sheep (not otherwise described); Muttons (M.); Ewes (E.); Lambs (L.); Hurtards or Rams (R.); and Hoggasters; Jercions; Wethers; Bidentes; Verveces; Dynmouths; Gymmers; Arietes. Occasionally sheep sold out of stock are described as Kebb, crones, rigones and pokes.

Pigs. The principal terms employed under this head are Boars (B.) or Apri; Sow (S.); Porci (Po.); Porculi (Pl.); Hogs (Ho.) and Porcelli (Pc.). A distinction is also drawn between Bacon Hogs and Porkers.

Poultry. Under this head are found Capons (C.); Hens (H.); Pullets (P.); Pigeons (Pi.); Geese (G.); Ducks (D.); Swans and Cygnets. The tables contain a few entries of Peacocks and game, and also of rabbits. Sometimes Capons are described as 'fat' or 'of grease.'

EGGS, CHEESE, AND BUTTER;

HONEY; WOOL AND WOOLFELLS; HIDES;

HAY AND STRAW; &c. &c.

TABLES OF THE

PRICES OF AGRICULTURAL PRODUCE.

MUSTARD SEED, GARLIC, & ONIONS.

NOTE.

THE following are such entries of Mustard seed (M.); Garlic (G.); and Onions (O.), as have been found. Mustard seed and onions are generally sold by the bushel; Garlic by the Bunch, and when no other quantities are designated, these are to be understood. There are a few entries of onion seed by the Pound. Sometimes onions are sold by the Rope or Bunch.

WOOL AND WOOLFELLS.

NOTE.

THE following tables contain prices of wool, woolfells, and fleeces. The wool is that of Ewes and Muttons, of Hoggs. and of Lambs.

The weights of wool are the Sack, the pack, the tod, the pondus or pund, the petra, the clove, and the pound. The weight of the petra varies, though not so much as in the earlier period.

Woolfells are described, especially in the accounts of monastic or collegiate bodies, by various terms, designating the fulness or shortness of the fleece, or distinguished by the time of year at which the sheep was slaughtered, and the fells were more or less valuable.

HAY AND STRAW.

NOTE.

THE following table contains prices of Hay, Straw, Litter, a few entries from Hickling of Reeds for thatching, and of Grass by the acre.

Hay and straw are generally sold by the carectata, plaustrata, or bigata, sometimes by the garb, bundle, truss, thrave, burden, or sarcina. In the early years Hay is sometimes sold by the tass, mullon, or arconius. It appears that the arconius sometimes contained 21 loads, but is often nearly equal to the carectata. Once Hay is sold by the fother, this being probably identical with the load. Reeds at Hickling are sold by the brachiata. Grass is sold by the acre.

The sign † denotes that carriage is included.

* The Hay is valued on the ground at 10/3 a load. Cutting, making & carting cost 14/10.

HOPS.

NOTE.

A few entries of the price of hops are given. They are generally sold by the hundredweight (*c*), occasionally by the pound, once by the stone. The sign † added to the price, implies as before, that the cost of carriage is contained in the price.

FUEL.

NOTE.

THE principal kinds of fuel contained in the following tables are wood, and sea or charcoal. In some districts, especially at and near Cambridge, sedge, thack, and turves are employed.

There is a great variety in the names given to wood used for fuel. The commonest is faggots. But bobbelyns, kydes or kedys (apparently the same as kiddles), ascels or astells, tosards, bavins, standards, shides, billets, sheddings, tall wood, pole wood, brushwood, great wood, and furze are found.

The measures also are various. Faggots, bavins, &c., are sold by the load, bigata, or the hundred (*c*). The hundred appears to be the long hundred of 120. Charcoal is sold by the quarter, the load, and the sack. Sea coal is sold by the chalder or chaldron, the fother, and the bushel. At one place charcoal is sold by the tuntyght, at another by the byn.

There are a few entries of Underwood (U.) by the acre.

When the sign † is added to the price, it denotes that carriage is included.

TABLES OF THE

PRICES OF PRODUCE.

ALE AND BEER.

NOTE.

Ale and Beer are sold by the gallon, the firkin, the kilderkin, the pipe, and the tun. Rarer measures are the cestra or sestre, the coule, the dozen, and the quarter. The last named is common at Oxford. The quality of the beverage is sometimes denoted.

WAX AND OIL.

NOTE.

WAX is sold by the lb. or hundred, *c*. Oil by the gallon. Wax is frequently described as Poleyn. There are a few entries of torches, which appear to have been generally a mixture of wax and some resinous substance.

FISH.

NOTE.

THE accounts which have been examined have supplied information to a very great extent on the various kinds of fish which were brought to market, and on the prices at which they were sold or bought, as well as on some of the measures by which they are reckoned.

In the accompanying tables, herrings are quoted without name, and placed first under each year or place at which they are found. They are occasionally sold by tale, more frequently by the barrel (white) and the cade (red). Sprats, which will be recognised under various names, are sold in the same manner.

The various kinds of salt fish, stock, ling, cod, mulvells, morucæ, fungiæ, lob-fish, chelyng, orgays or organ, hard fish, mud fish, haburden, green fish, hake, &c., are generally sold by the hundred (*c*), but not infrequently, and in many parts of the country by the warp, or the burden.

Salmon is sold generally by the barrel. Eels by the barrel and by the stick. Sturgeon by the barrel, the pound, and the piece. Entries will be found of congers, dogdrave (supposed by some to be dog-fish), and porpoise. Lampreys are rare and generally costly.

There are occasional entries of fresh fish, but this food, though a common article of consumption, was generally kept in the stews or fishponds of the monastery or college. Dentrices are probably pike. Tench and trout are occasionally found, and very copious information as to such kinds of fish are supplied from the ledger of Hickling priory, which is among the Tanner MSS. of the Bodleian Library. The principal mart for all kinds of salt fish was as before, Stourbridge fair, at Barnwell, near Cambridge.

TABLES OF THE

PRICES OF MATERIALS.

SALT.

NOTE.

SALT is generally sold by the bushel or quarter. In large quantities it is also sold by the wey, and occasionally by the chalder or chaldron. The wey appears to vary from forty to fifty-four bushels. Twice it is sold by the pipe, and once by the wychwerke of two quarters.

It is described as black, grey, or white; as great, or coarse, and small. Bay salt is distinguished from white salt. At Finchale it is sometimes described as Peytous, i. e. Poitou salt, the price of this product being generally higher than that of salt from other sources.

Where no other measure is given, the quarter is to be understood. Sometimes the cost of carriage (†) is included in the price.

IRON AND STEEL.

NOTE.

IRON is sold either raw or wrought, generally the latter. Steel is also called Osemond, but there are very few entries of this article. In the later years, cast iron is employed for ordnance. Sometimes the foreign origin of the article is designated, as Spanish, Bilboa, or Seville, Amyas, and Spruse, by which is probably meant Swedish iron, or at least the produce of the countries bordered by the Baltic. Siviletto iron, mentioned once, appears to be Spanish.

Raw iron is sold by the pound, the petra, the quintal, the hundred weight, and the ton, once by the piece, once by the massa; wrought iron, including nails and wire, generally by the pound. Steel is sold by the garb or sheaf, the gad, the burden and the barrel.

* 30 bushels to load.

METALS.

LEAD, SOLDER, TIN, COPPER, BRASS, SILVER AND GOLD.

NOTE.

ENTRIES to which no name is given are purchases of Lead. It is sold by the fother, the cwt., the fotmael, with which the fowte (1525) is probably identical, the petra and libra. It is once sold by the sow (but the weight of the article is also given in cwts.), by the nail, the telum, the pondus, the web, and the peys.

The other metals, except gold and silver, are sold by the lb., though in the later years the cwt. is used. Pewter or garnish is extensively bought for table use, and sometimes entries are found of old or broken metal. Pewter goes also by the names of Electrum and Latten, frequently of counterfeit (contra factum), a name which seems to be given to denote that the fashion in which the metal was wrought was like that of silver plate.

Gold and silver are generally sold by the oz., sometimes by the lb.

HEMP AND ROPE.

NOTE.

PRICES of Hemp and Rope are given by the lb. or cwt. and qr. as the case may be, sometimes by the petra. In the later years the entries chiefly refer to purchases for the navy, and often denote the origin of the article. A few entries are given of the prices of cord and twine.

BUILDING MATERIALS.

NOTE.

THE entries in the following tables are of different articles employed in building, chiefly stone and wood. Stone is of various kinds; rough or rag being generally purchased by the load, while the finer kinds are bought by the square foot. Occasionally the stone is purchased after having been dressed for the building which is being constructed. Stone is also bought by the ton.

Timber, rough, dressed, or sawn into the several quantities which were recognised in the commerce of the middle ages, is sold by very various measures, and under very various names. The highest qualities are estrich and wainscot. Sometimes the name seems to imply the natural curves of growth which were selected for the ribs of a ship, or the roof of a house.

The hundred, *c*, is generally 120 square or superficial feet, as the case may be. The sign † means that the carriage is, the sign – that carriage is not included.

TILES, SLATES, BRICKS AND TILE PINS.

NOTE.

Tiles (T.) are of very various kinds, being plain, i. e. for ordinary purposes of roofing; or designed for the cover of ridges, and water courses, both being generally sold by tale, and the latter being ordinarily ten times the value of the former. But some entries of paving tiles will also be found. Slates (S.) are of less numerous kinds, the distinction drawn between them being as a rule that of size. The slates are derived from quarries of fissile stone, in Oxfordshire and elsewhere.

The use of bricks begins early, but scantily and very locally, in the fifteenth century. By the middle of the century the use of this material is common in considerable buildings, often superseding stone, where it was easily procured. It will be seen that the employment of it commences in Eastern England. The manufacture of brick was soon put under legal restrictions, and the quality was, as is well known, exceedingly good.

Tile and slate pins are sold by tale or measure, the price being very various. They are probably a bye product.

LATH AND OTHER NAILS.

NOTE.

In the following series, nails not otherwise designated are to be taken for lath nails, and are generally sold by the thousand, but sometimes by the sum and bag. Other nails, known by very various names, are sold by the hundred (*c*) or thousand (*m*) as the case may be. Occasionally the foreign origin of the nails is noted. The signs xx, x, &c. are used to denote nails so called, originally at so much in pence the hundred.

PRICES OF TEXTILE FABRICS.

LINEN AND CANVAS.

NOTE.

THE following tables contain prices of various kinds of flax and hemp fabrics, for wear as linen, for use as table cloths or napkins, and for coarser purposes, as fans for winnowing and sailyards for windmills. In the later part of the period prices of sail cloth are also given.

Linen for domestic use, generally purchased by the ell, goes by many names, these generally denoting the origin of the fabric. Thus we find Burgundy, Flanders, Brabant, Holland (coarse and fine), Diaper, Normandy, Utnoll; as well as what appear to be domestic products, Bresell or Bristol, Sultwich, Garnsey, Lancashire and Offenbridge linen.

Canvas for sails are known as Poldavies, English and foreign Madrenaxes or Midrenaxes, Olderon and Vittery canvas.

The names given to linen are very various, as are also the quantities in gross. These will be hereafter commented on.

WOOLLEN CLOTHS, &c.

NOTE.

THE following tables contain prices of outer clothing and blanketing, though it is not always clear that 'blanket' was used in the modern sense. Most of the entries are for cloth purchased for liveries by colleges and monastic bodies, and in the majority of cases, the cloth, of various quality, is purchased by the pannus. The pannus should on an average contain twenty-four yards, but the piece is very often measured.

The cloth was of various colours and patterns.

The reader will also find entries of the more precious fabrics of velvet, satin, cloth of gold, damask, &c., for the use of opulent persons or for Church vestments, as well as various other articles of dress.

The origin of the cloth is sometimes given.

TABLES OF THE

PRICES OF FOREIGN PRODUCE.

WINE.

NOTE.

Wine (by which is to be understood, when no special designation is iven to it, Red Bordeaux) is sold by the gallon in small quantities, and robably on draught from the cask, or by the tun (dolium), the pipe, the arrel, the hogshead, the tierce, the puncheon, and the cade. Sweet wine s sold by the gallon, the butt and the rundlet. Rhenish wine by the auln r aum.

The accounts designate many kinds of wine besides Red and Sweet, s Sack, Muscadine, Muscadel, White, Claret, Malmsey, Bastard, Vinum reticum, Rhenish, Romney or Romaney, Spanish, Ossey, and Tyre. nce the accounts give a price of wine from the growth of an English ineyard at Windsor, and more entries of this produce might have been upplied had the quantity as well as the price of the produce sold been iven. There is reason to believe that the sales of Otterton in Devonshire re of English growth.

There are, especially in the later period, a few entries of spiced wine nder the name of Hippocras.

The sextary, which is occasionally found as a wine measure, is a portion r allowance containing five to six gallons.

TABLES OF THE

PRICES OF LABOUR.

NOTE.

THE price of labour in the following Tables has been roughly divided under two heads, the first being that of ordinary artizans, the second of farm or common labour. The division is not accurate, but it is not easy for example to distinguish between a house and a rick thatcher. Sometimes the same service is ranged under either head, as it seemed at the time to be more highly or more poorly paid, and often the labour of the help, which is actually common labour, has been taken with the skilled or mechanic's labour.

The abbreviations used are:—C. Carpenter, S. Sawyer, T. Tiler, M. Mason.

When the figures precede the rate of wages, the first figure denotes the number of persons employed, the second the number of days work paid for collectively, when the amount is not reducible to the ordinary fractions of a penny, though sometimes, especially in the case of sawing, two persons are regularly hired and paid together.

Piece work, whether that of the artizan or of the farm labourer, is generally quoted after entries of day wages.

As in the second volume, entries of payments for Threshing mean at the quarter, Reaping and Mowing at the acre.

The price of the service will generally suggest to the reader whether the labourer's food is added to his money wages. In the early years the cost of food ranges from 2*d.* to 1½*d.* per diem.

In the 16th century a great deal of information as to rates of wages is obtained from the accounts of Royal Works and the Navy.

In some of Elizabeth's Navy accounts the workmen are boarded and lodged, and paid journey money in coming from and going to the place at which they had been impressed. The board of these workmen is always by contract, the contract being renewed each quarter.

PROCLAMATION (IN MS.)

ON THE

CURRENCY,

MARCH 1562.

Although the queen's Majesty had determined (after the turning of the base and copper monies to fine sterling monies, which to her great honour and the weal of the Realm was ended about Michaelmas last) to have forborne for the ease of the people from the amendment of the value of the same fine moneys for some convenient time and with some kind of moderation therein, yet is her Majesty now, upon many and necessary causes newly happened, moved and induced (though to her own great private charge) to alter this her former purpose, both for the time and the moderation in the doing thereof, whereof amongst other causes, the rashness of a great sort of people showing their wit out of season and the covetousness of a greater sort are the principal, the one by spreading through the Realm of Rumors that from one Market day to another the monies should be decried, meaning thereby to prevent unseasonably and untimely her Majesty's determination (for stay whereof her Majesty gave order by Proclamation, but as it now appeareth not thereby remedied by reason the same rumours were before hand universally spread and driven into men's heads by sinister means) the other sort taking hold of the Rumours and only upon covetousness furthering the same have already universally enhanced the prices of all things to be sold for money, according to the rate as though the money were already decried; and now for that it is evident that the universal expectation for the decry of the money is by means of these former rumours so constantly and deeply settled in men's heads and thereafter the prices of all things so highly enhanced that until the moneys be indeed brought to the value at the which they were intended and ought to be, not only the meaner sort of people as labourers in Husbandry handicraft men and such like, but also all serving men soldiers and others living only by pensions and wages and therewith buying their victual and sustenance shall be pitifully oppressed with unreasonable prices and dearth. Therefore her Majesty having compassion of their estate for the relief of them and for the remedy of such a violent

dearth, and consequently with one deed (that hereafter of necessity ought to have followed) to make such a final certain end and honorable establishment of the state of the monies of this Realm as hath been long wished, and is never hereafter to be changed ne altered by the advice of her Council, and of many other such wise and expert men, doth declare and by this proclamation doth ordain that all manner of monies now current within this realm shall after this proclamation be valued and current as hereafter followeth and shall remain without change being in very deed the standard that hath continued and remained in this realm since the sixth year of King Edward the fourth her Majesty's great grandfather and so all the times of King Edward the fifth King Richard the third and King Henry the seventh, and so forth until the 16th year of the reign of King Henry the Eighth her Majesty's father, which is so rich and good as none can be better for the state of this realm thereby to flourish and grow in wealth and good order.

First the monies of gold shall be current as followeth

Fine gold, the	sovereign	that	30/.	shall	20/.
	royal	was	15/.	be	10/.
	angel	current	10/.	current	6/8.
	half angel	for	5/.	for	3/4.
Crown gold, the	sovereign	that	20/.	shall	13/4.
	half sovereign	was	10/.	be	6/8.
	crown	current	5/.	current	3/4.
	half crown	for	2/6.	for	1/8.
Strange gold, the	French crown	that was	6/.	shall be	4/.
	Burgundian crown	current for	6/.	current for	4/.

Secondly the moneys of silver shall be current as followeth

Fine sterling silver, the	shilling	that	1/.	shall	/8.
	half shilling	was	/6.	be	/4.
	quarter shilling	current	/3.	current	/2.
	three halfpence	for	/1½.	for	/1.
	three farthings		/0¾.		/0½.

And forasmuch as there be three other pieces of silver moneys current in this realm that is to say a groat two pence and a penny the which cannot be reduced to any good and even reckoning one by one, her Majesty meaning that no person should take more harm by them than by her other money, doth ordain that three of the same groats shall be current for eight pence and three of the said pieces of two pence shall be current for a groat, and three of the said pence shall be current for two pence, and for that the quantity thereof in the realm is not great, and yet combersome to the people to pay one by one, her Majesty is pleased betwixt the end of the next month and November following (though it shall be to her private charge) to deliver at her Mint for cash of the said three pieces as much other fine money as the same be now valued by this proclamation. And all this her Majesty would to be accepted of all good natural subjects as one of the principal acts tending to the recovery of the ancient fame and wealth of this realm, and that

no credit be given to malicious busy and envious persons that either of ignorance or malice shall deprave this noble act, wherein her Majesty evidently sustaineth all this present so great a burthen in her present treasure, as (were it not for respect of the common weal) ought not to be by her Majesty borne. But her principal care is (with God's grace and special assistance) to preserve always the weal surety and honour of this realm before her own private weal or estate.

Given at the palace of West[r]. the — day of March in the fourth year of her Majesty's reign 1562.

God save the Queen.

INDEX. I.

PLACES.

NOTE.

THE following index contains the names of those places only which have supplied evidence of the price of corn. It was not thought necessary to add the names of localities from which other articles were procured.

As in the previous volumes, it has not been always possible to determine the exact position of the place from which the corn prices have been obtained. But in the great majority of cases, and in all that are important or continuous, this has been effected.
